BOOK SYNOPSIS

This is a book of reflections that aims to help you think, a compendium of both technical training and autodidactic humanism. That humanism suggests building a culture of constant improvement and renewal as a long-term strategy not only in times of crisis, but also in times of growth. It is a book that is based on everyday life experience. It is not an academic text, but a book of reflections that aims to help you think and act. We do hope that it is useful to you and that it will positively impact you. We are not facing complex times, but an exciting time, in which our great opportunity has not come yet. One way or another, all ages have been very difficult. You just need some historical perspective to realize that we now have the best technology, the best communication between humans and great knowledge of each other.
